

Pivot Prime website: your comments and what was done

2 October 2026 · Prepared by Saif · pivotprime.ae

Every request in your 30 September deck was checked on the live site, on a computer and on a phone, and then checked again by a second, independent review.

35 of the 37 are done, and 2 are open: the Nurture screenshot, which needs a new picture from you or Saif, and the email to subscribers when an article is published, which is a new feature that has not been built.

Your earlier decks were checked as well: nothing they asked for has been undone, and 6 earlier requests were put right during this check.

Each request quotes your own words. Where your slide showed what you wanted, your picture is on the left and the live site on the right.

Slide 1

The logos

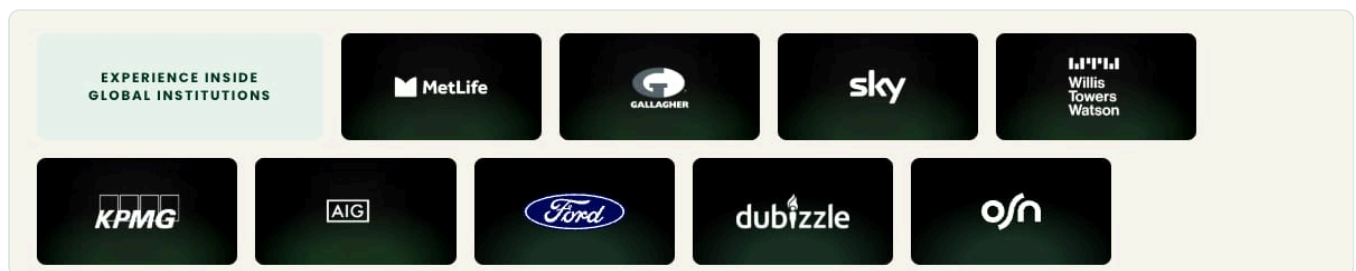

1.1 Done

The institutions strip still shows MetLife, Gallagher, Sky, Willis Towers Watson, KPMG and AIG. Ford, Dubizzle and OSN are missing.

What was done. Ford, dubizzle and OSN are now in the "Experience inside global institutions" row after AIG, in the order your slide names them, on dark rounded tiles the same size as the others with the same faint green glow at the foot, and all six earlier logos are still there. Ford keeps its own navy oval with white lettering, because in white the whole oval becomes a blank shape, and for visitors whose phone or computer is set to reduce movement the row stands still and wraps onto extra lines so every logo shows.

The glow at the foot of the new tiles is drawn in the site's own colours, which is Saif's rule, so it is a shade bluer than on the older tiles, and the row sits within the page's content width, as your slide 11 asked.

Live page: pivotprime.ae/

The live site, on a computer

1.2

Done

The "Companies we have delivered for" strip has none of Cinnacare, Nurture UAE, Scentmatic or BookMeetings yet.

What was done. Cinnacare, Nurture UAE, Scentmatic and BookMeetings are now in the "Companies we have delivered for" row after Nivishe, in the order your slide names them, on dark rounded tiles the same size as the others with the same faint green glow at the foot, and none of the existing companies has gone. Nurture keeps its own purple app icon, now shown larger, because in white the whole icon becomes a blank square, and for visitors whose phone or computer is set to reduce movement the row stands still and wraps onto extra lines so every logo shows.

The glow at the foot of the new tiles is drawn in the site's own colours, which is Saif's rule, so it is a shade bluer than on the older tiles, and the row sits within the page's content width, as your slide 11 asked.

Live page: pivotprime.ae/

The live site, on a computer

Slide 2

The services section

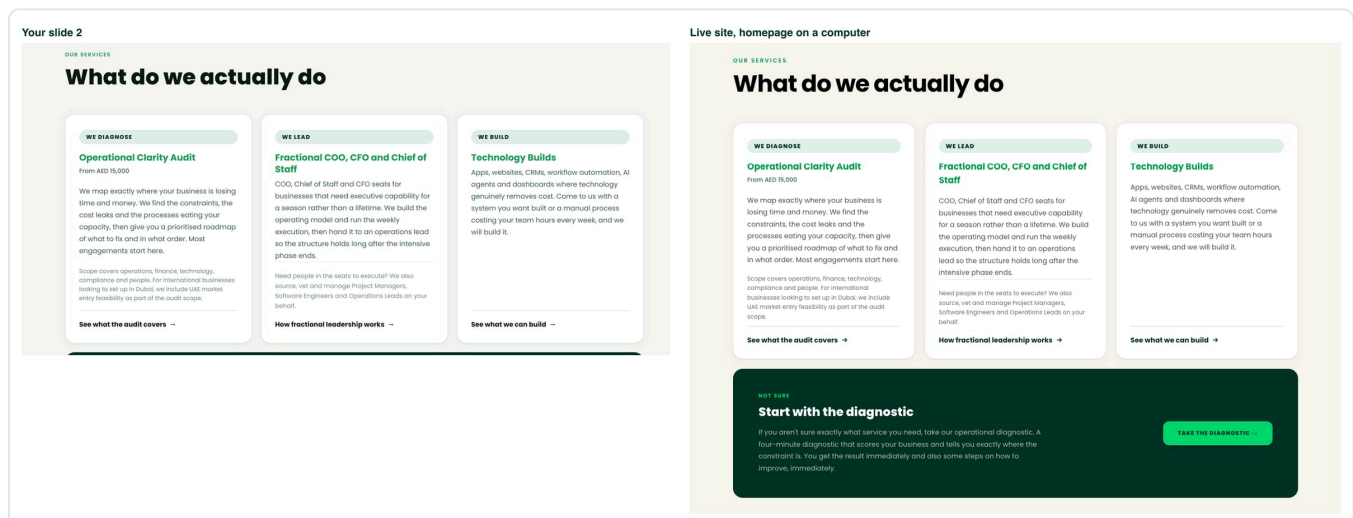

2.1 Done

[1] Have refined it so it reads as 3 cards under diagnose, lead and build.

What was done. The services section on the homepage and on the Services page shows three cards headed "WE DIAGNOSE", "WE LEAD" and "WE BUILD", each label a full-width pale green bar with heavier dark lettering above your titles in green, with your rounded corners and, on a computer, the We Lead title breaking after "Chief of" as yours does. The cards now carry the faint shadow of your page, so the gaps between them stay the colour of the page, and they sit side by side at equal widths on a computer and stack in the same order on a phone.

On the homepage the cards are a little narrower than in your picture because every section there now shares one width, as your slide 11 asked, and the colours, including the thin line round each card, are the site's own, which Saif keeps the same across the site.

Live page: pivotprime.ae/#services

Your slide on the left, the live site on the right

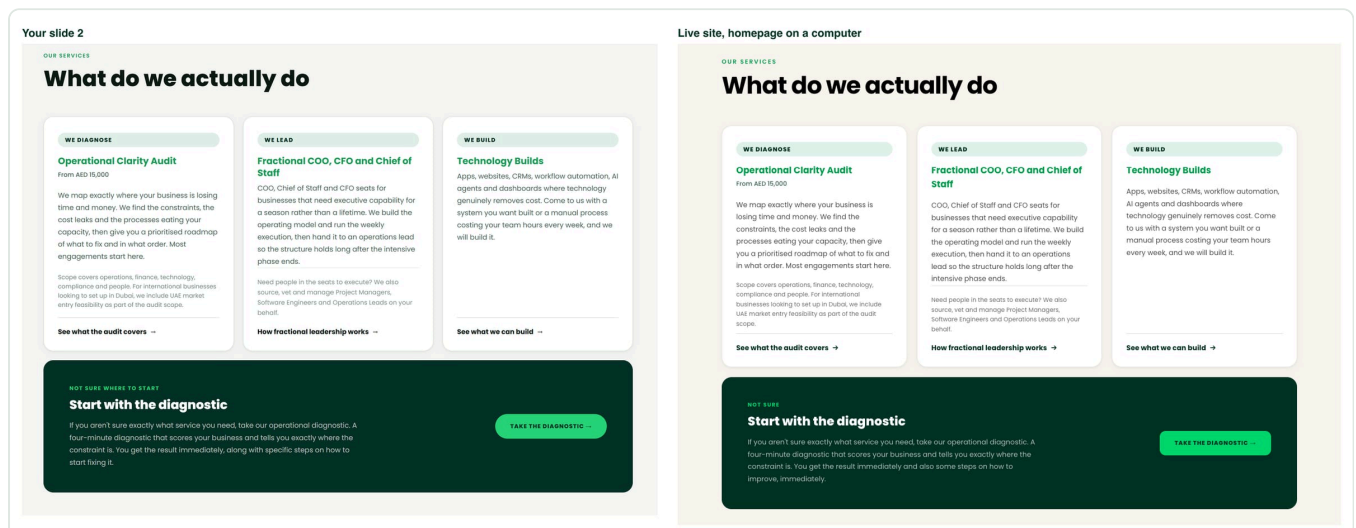

2.2 Done

And only 3 offers now, see the html for this here - <https://claude.ai/code/artifact/eeb21f42-35a9-4dce-ac61-a9c22f2faa19>

What was done. Build and Place is a short note in the We Lead card and UAE market entry a sentence in the We Diagnose card's note, both worded as in your picture, so the section shows only three offers, with a price on the audit only, the thin lines where yours are, your line spacing, and arrows after the links that match those on the page your note links to. The dark panel beneath has your margins, your smaller label, your heavier heading and your narrower, smaller text, so it stands as tall as yours, and its button has the arrow.

The panel keeps the wording of the page your note links to, its button stays rectangular as your 26 September note asked, it shares the homepage's one width from your slide 11, and its colours are the site's own, which Saif keeps the same across the site.

Live page: pivotprime.ae/#services

Your slide on the left, the live site on the right

2.3 Done

The Services page still says "which of the five you actually need". Change it to three.

What was done. The Services page no longer says "five" anywhere: it shows the same three cards and diagnostic panel as the homepage, and the line under its heading begins "Three services, used on their own or together." The short description search engines show for the page names your three services instead of the five old ones.

The sentence was in the old sixth card, which your diagnostic panel replaced, so following your design it has gone with that card rather than being reworded.

Live page: pivotprime.ae/services

OUR SERVICES

What do we actually do

Three services, used on their own or together. Most engagements begin with the audit, because we will not take responsibility for a fix we have not measured.

WE DIAGNOSE

Operational Clarity Audit

From AED 15,000

We map exactly where your business is losing time and money. We find the constraints, the cost leaks and the processes eating your capacity, then give you a prioritised roadmap of what to fix and in what order. Most engagements start here.

Scope covers operations, finance, technology, compliance and people. For international businesses looking to set up in Dubai, we include UAE market entry feasibility as part of the audit scope.

[See what the audit covers →](#)

WE LEAD

Fractional COO, CFO and Chief of Staff

COO, Chief of Staff and CFO seats for businesses that need executive capability for a season rather than a lifetime. We build the operating model and run the weekly execution, then hand it to an operations lead so the structure holds long after the intensive phase ends.

Need people in the seats to execute? We also source, vet and manage Project Managers, Software Engineers and Operations Leads on your behalf.

[How fractional leadership works →](#)

WE BUILD

Technology Builds

Apps, websites, CRMs, workflow automation, AI agents and dashboards where technology genuinely removes cost. Come to us with a system you want built or a manual process costing your team hours every week, and we will build it.

[See what we can build →](#)

NOT SURE

Start with the diagnostic

If you aren't sure exactly what service you need, take our operational diagnostic. A four-minute diagnostic that scores your business and tells you exactly where the constraint is. You get the result immediately and also some steps on how to improve, immediately.

[TAKE THE DIAGNOSTIC →](#)

The live site, on a computer

Slide 3

Meet the CEO & Founder

3.1 Done

[1] Eyebrow heading – Meet the CEO & Founder

What was done. Your eyebrow heading, "MEET THE CEO & FOUNDER", sits in small green capitals just above the main heading of the founder section on the homepage, on a computer and on a phone. It has the letter spacing of your picture, and on a computer the space under it is also as in your picture.

The words follow your written note rather than the "Our CEO and Founder" in your picture, and the green and the cream behind it are the site's own colours, which Saif keeps across the whole site.

Live page: pivotprime.ae/

Your slide 3

OUR CEO AND FOUNDER

Iram Kauser has spent sixteen years running operations inside billion-dollar organisations. Pivot Prime is built from that.

Live site, computer

MEET THE CEO & FOUNDER

Iram Kauser has spent sixteen years running operations inside billion-dollar organisations. Pivot Prime is built from that.

Your slide on the left, the live site on the right

3.2 Done

then as per second pic here

What was done. The section now follows your second picture: your eyebrow heading, your main heading in the same heavier lettering with its lines as close together as yours, your two paragraphs with your more open line spacing, then a "MEET THE FULL TEAM" button the size of yours, in your heavier lettering with your long thin arrow one space after the words and no shadow, which opens the team section of the About page. Your photo stays on the right on a computer and above the text on a phone.

The button stays rectangular as your note on this slide asks, your first paragraph runs one line longer because it sits beside your photo within the single width your slide 11 asked for, and the colours are the site's own, which Saif keeps across the whole site.

Live page: pivotprime.ae/

Your slide 3

OUR CEO AND FOUNDER

Iram Kauser has spent sixteen years running operations inside billion-dollar organisations. Pivot Prime is built from that.

Senior operating roles at AIG, MetLife and Gallagher, across the UK, the Middle East and Africa. Chief of Staff to a regional CEO, managing priorities across more than 150 staff. Pricing and portfolio strategy for a book worth more than \$120 million. Her background spans the full breadth of what it actually takes to run a business: compliance, finance, IT, HR and transactional processing. Not strategy or theory, but the execution itself. Iram knows how to diagnose, lead and build.

She moved to Dubai from the UK ten years ago. The team around her reflects the same depth, with real experience across the same disciplines and the same region.

MEET THE FULL TEAM →

Your slide on the left, the live site on the right

3.5 Done

[3) reminder buttons to remain rectangular as currently is

What was done. The button in this section keeps its rectangular shape with small rounded corners, and so does the "TALK TO US" button in the top bar and in the menu on a phone. None of the homepage buttons has become a pill shape.

Only its rectangular shape is kept from your first picture, as your note asks: its words, heavier lettering, size, long thin arrow and lack of a shadow now follow your second picture.

Live page: pivotprime.ae/

Your slide on the left, the live site on the right

Slide 4

Your biography and LinkedIn

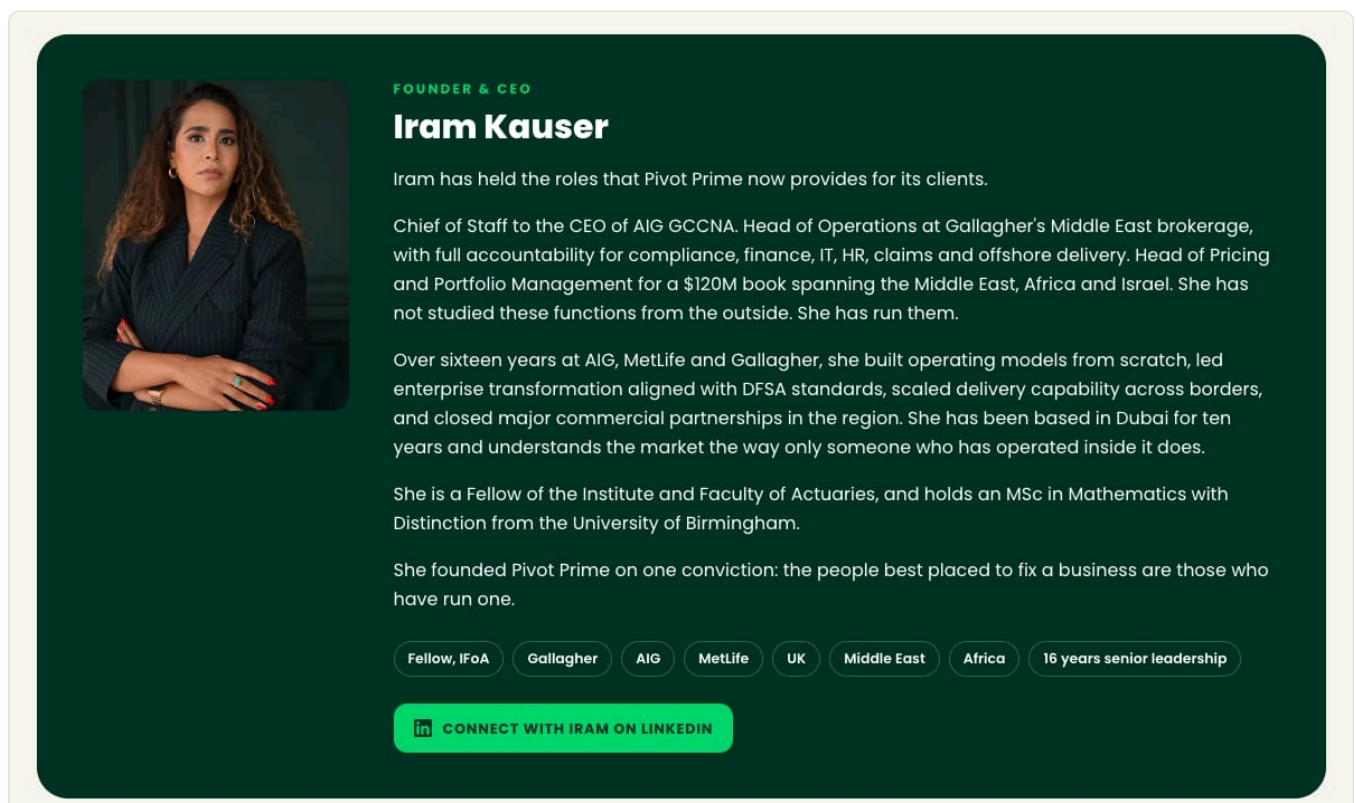

4.1 Done

[1] Below add my linked in page, and say connect with Iram on LinkedIn

What was done. Your card on the About page has a green "Connect with Iram on LinkedIn" button under your biography and tags, the same size and style as the team's buttons in your team file. It opens your LinkedIn profile in a new tab, on a computer and on a phone, where its words run onto two lines to fit the card.

The button goes to the LinkedIn address Saif supplied for you, because your slides and your team file do not give one.

Live page: pivotprime.ae/about#team

The screenshot displays a dark-themed biography card for Iram Kauser. On the left is a portrait of Iram. To the right, her title 'FOUNDER & CEO' is in green, followed by her name 'Iram Kauser' in white. Below her name is a paragraph about her roles at Pivot Prime. Further down is a detailed paragraph about her career at various firms. Below that is a paragraph about her academic qualifications. At the bottom left of the text area is a paragraph about her founding conviction. To the right of this text is a row of eight tags: 'Fellow, IFoA', 'Gallagher', 'AIG', 'MetLife', 'UK', 'Middle East', 'Africa', and '16 years senior leadership'. At the very bottom is a green button with the LinkedIn logo and the text 'CONNECT WITH IRAM ON LINKEDIN'.

FOUNDER & CEO
Iram Kauser

Iram has held the roles that Pivot Prime now provides for its clients.

Chief of Staff to the CEO of AIG GCCNA. Head of Operations at Gallagher's Middle East brokerage, with full accountability for compliance, finance, IT, HR, claims and offshore delivery. Head of Pricing and Portfolio Management for a \$120M book spanning the Middle East, Africa and Israel. She has not studied these functions from the outside. She has run them.

Over sixteen years at AIG, MetLife and Gallagher, she built operating models from scratch, led enterprise transformation aligned with DFSA standards, scaled delivery capability across borders, and closed major commercial partnerships in the region. She has been based in Dubai for ten years and understands the market the way only someone who has operated inside it does.

She is a Fellow of the Institute and Faculty of Actuaries, and holds an MSc in Mathematics with Distinction from the University of Birmingham.

She founded Pivot Prime on one conviction: the people best placed to fix a business are those who have run one.

4.2 Done

do this for all staff.

What was done. Justin, Nisha, Saif and Khushi each have the same green "Connect with ... on LinkedIn" button under their biography and tags, and each opens that person's own LinkedIn profile from your team file in a new tab. On a computer Justin's and Nisha's buttons run onto two lines, as in your team file, and on a phone every button fits inside its card on two lines.

Live page: pivotprime.ae/about#team

FRACTIONAL CFO

Justin Ford

Justin has run the finance function inside global corporates and fast-growing Gulf scale-ups for more than fifteen years. He trained at KPMG and managed a \$650M+ inventory balance at Ford Motor Company. In Dubai he has held senior finance roles at OSN, dubizzle, International SOS and BitOasis, where he built the plan behind its Series C raise. Since 2023 he has been a fractional CFO to founder-led businesses, and he runs his own UAE wellness brand, Life Within.

Slide 5

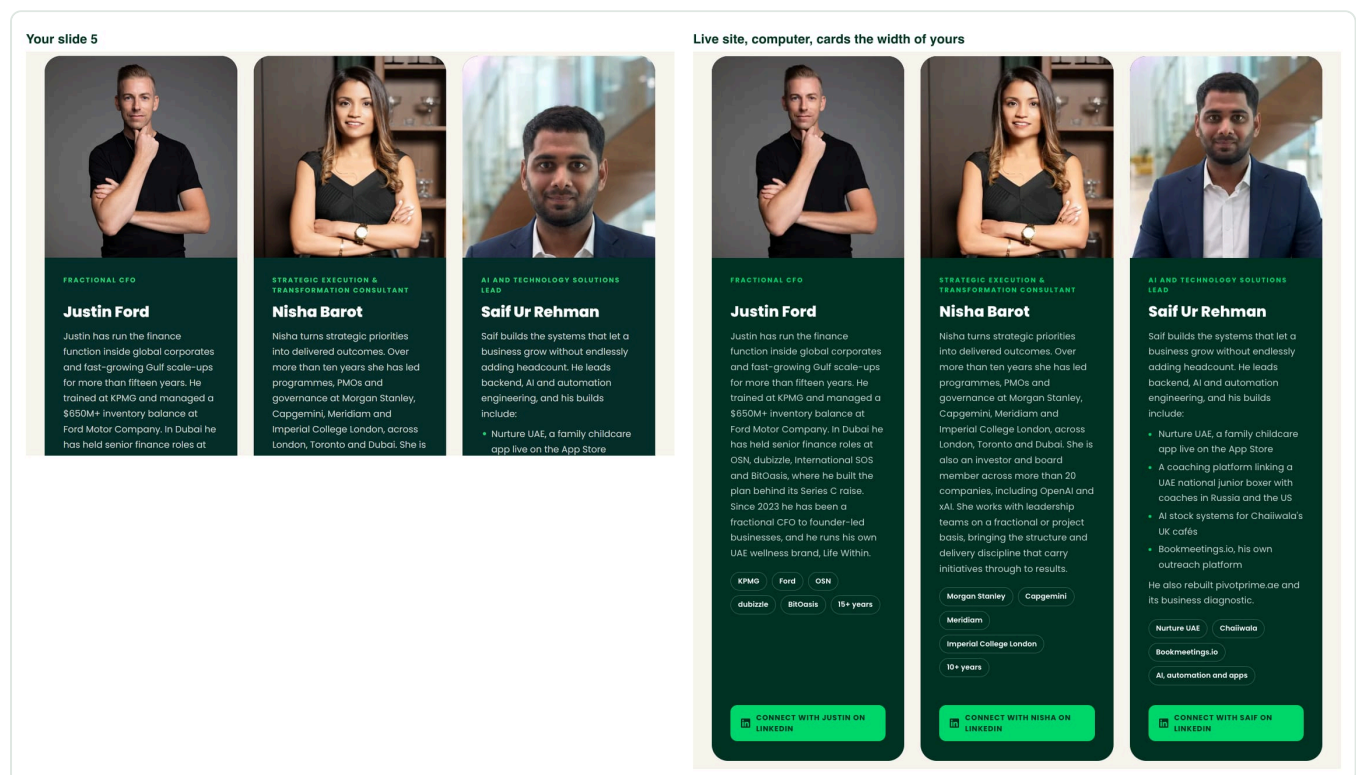

The team

5.1 Done

We have to add Nisha to the website – her bio and details are attached

What was done. Nisha is on the About page, second in the row between Justin and Saif, with her job title, biography, tags and photograph as in your file and her photograph framed as in your picture. Her card no longer has a thin dark edge, so her photograph runs right to the edge of the card, and her tags sit a little further below her biography, as in your file.

Live page: pivotprime.ae/about#team

Your slide on the left, the live site on the right

5.2 Done

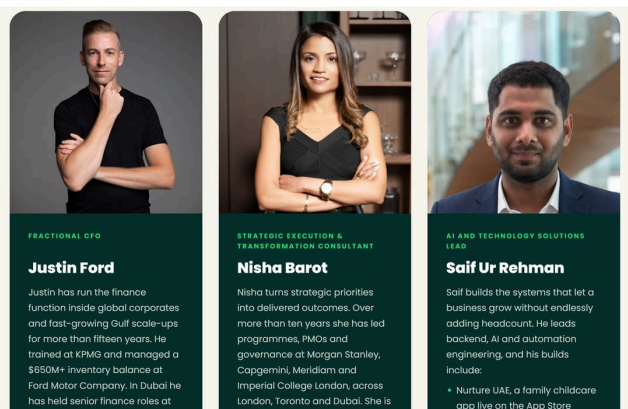

Everyones bio sections to be updated a bit see attached html

What was done. Every biography, job title and tag reads exactly as in your file, in your layout of three tall cards with Khushi's wide card beneath, with the names in your heavier lettering, the lettering sizes of your file and no card shadows. The thin dark line round each card is gone, so every photograph runs right to the edge of its card, and the tags sit a little further below each biography, as in your file.

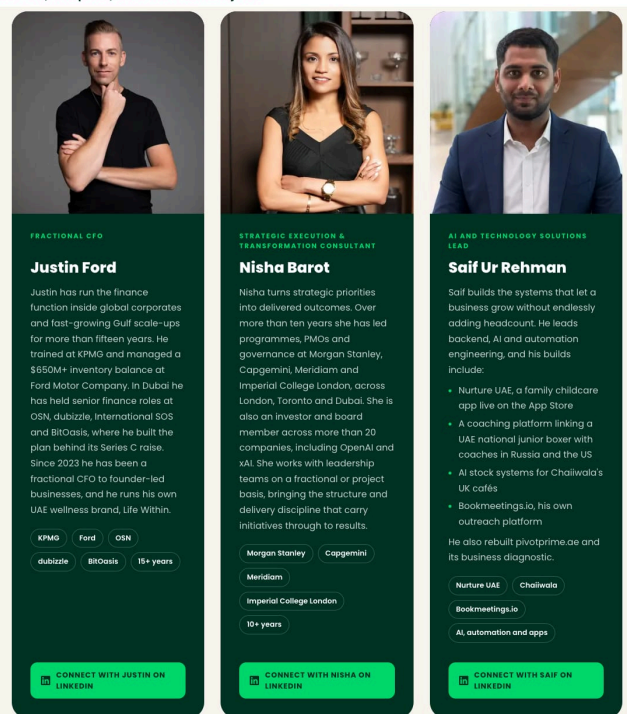

The cards keep the site's own dark green and Saif's photograph keeps the framing he chose, both on Saif's instruction.

Live page: pivotprime.ae/about#team

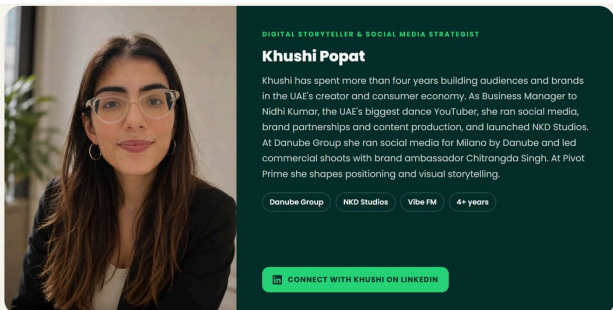

Your slide 5

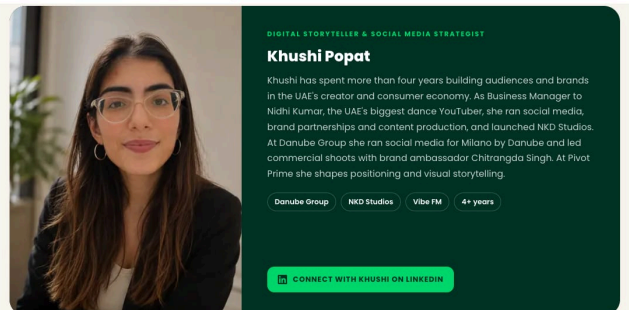

Live site, computer, cards the width of yours

Your slide 5

Live site, computer, cards the width of yours

Your slide on the left, the live site on the right

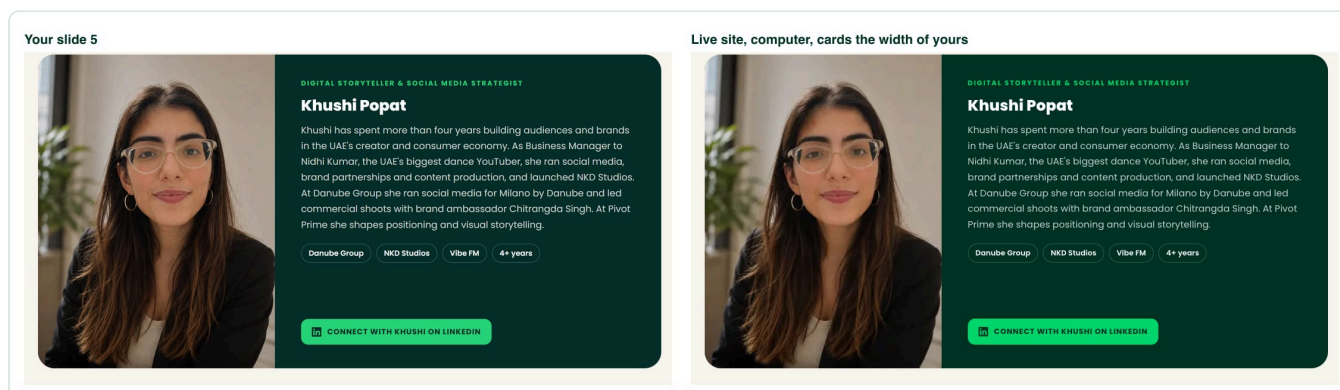

5.3 Done

Add everyone's linked in to the bottom of their bios

What was done. Everyone on the team, including you, has a green 'Connect with [name] on LinkedIn' button at the foot of their biography that opens their LinkedIn page in a new tab, with the lettering size and spacing of your file. As in your own file, the labels on Justin's and Nisha's buttons run onto two lines on a computer, and on a phone Saif's label now fits on one line.

Your own button opens the LinkedIn address Saif supplied, because your team file gives addresses for the other four people only.

Live page: pivotprime.ae/about#team

Your slide on the left, the live site on the right

Slide 6

The Nurture screenshot

6.1

Open

Still to do: the Nurture screenshot still says "Good morning, Test App". Replace it with a live screenshot showing a real name.

What was done. Nothing has changed yet: the Nurture card on the homepage and the About page still shows "Good morning, Test App", because no new screenshot from the app has arrived. The name has not been painted over or cut out, as that would spoil the picture of the app.

Still needed. A screenshot of the live Nurture app's home screen, the same screen as now, showing a real-looking name in place of "Test App", taken from a demo account, because a real family's name and details should not appear on a public website. It is needed from you or Saif, taken on a phone in the same tall shape, and it will simply replace the current picture on the same card.

Live page: pivotprime.ae/

CASE STUDY 1

Nurture

Childcare Technology · UAE

A childcare app where the household actually shares the day

Built by our technology team.

The challenge

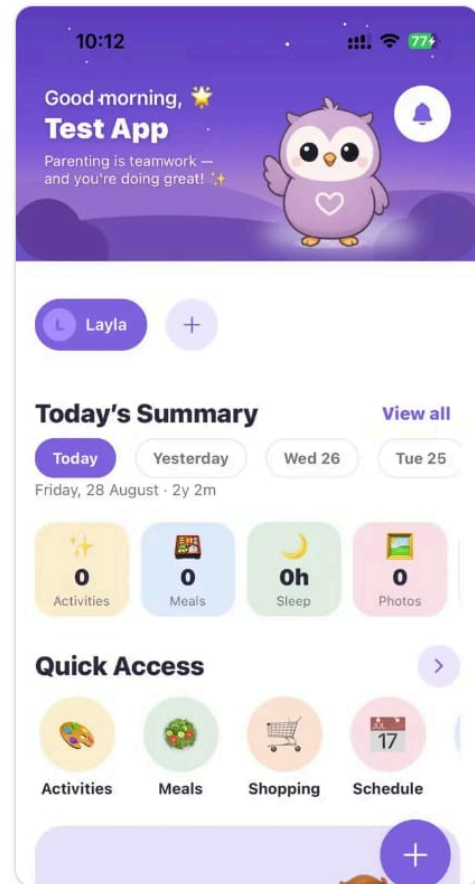

In a UAE household the people caring for a child are rarely all in the same place, and often do not share a first language. Parents, nannies and drivers each hold part of the day, and none of them holds the whole of it.

The results

We built one place where the whole household sees the same day.

- ✓ Real-time care logs for feeds, naps and nappies, with photo and video to a shared family timeline
- ✓ Instant messaging with one-tap translation across six languages
- ✓ Role-based access, so parents, nannies and drivers each see only what they should
- ✓ An activities hub of age-appropriate developmental guides, with Nurture Academy and its certified early-childhood courses
- ✓ AI meal planning, with a caregiver cookbook alongside it, and child development tracking across the household
- ✓ Built to UAE PDPL, encrypted in transit, with hashed PINs

[VIEW THE PRODUCT →](#)

The Nurture card still shows the Test App screenshot: no new screenshot has been supplied.

Slide 7

The diagnostic opening screen

7.1

Done

[1] FREE DIAGNOSTIC, SLIGHTLY BIGGER, OR HIGHLIGHTED,

What was done. The label now reads FREE DIAGNOSTIC without the old Pivot Prime in front. On a computer it is the size your picture shows, which is bigger than before and bigger than the small labels elsewhere on the site, and it sits on a pale green highlight.

The pale green box behind the label follows your note asking for the label to be bigger or highlighted; your picture shows it without one.

Live page: pivotprime.ae/diagnostic

Your slide 7

Live site, computer

Your slide on the left, the live site on the right

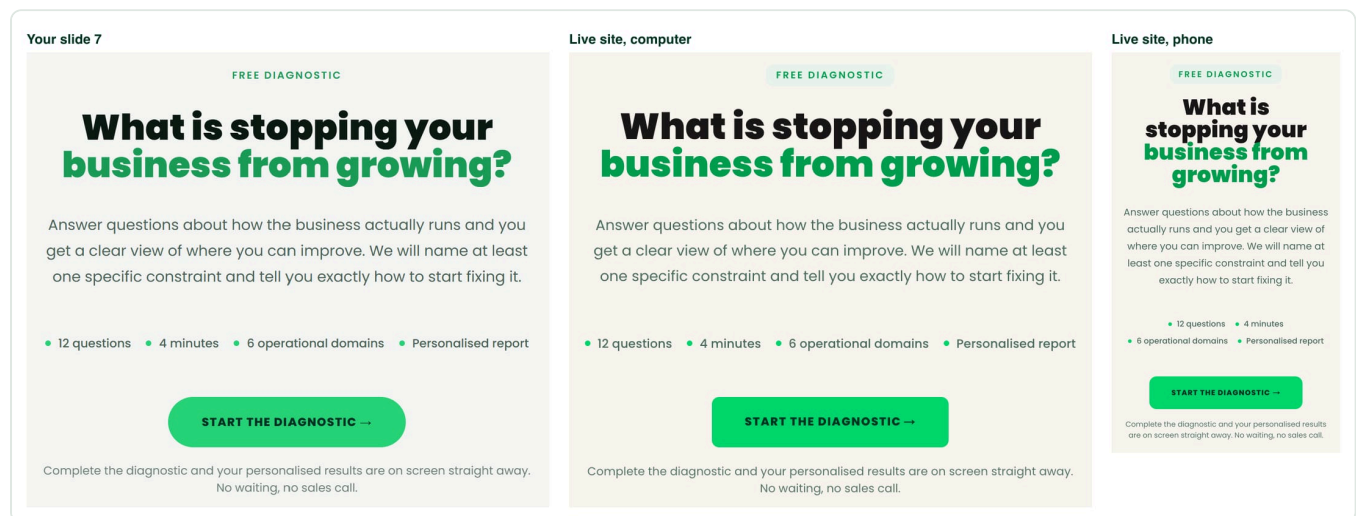

7.2 Done

[2] Main page to look like second pic shown here

What was done. The opening screen follows your second picture from top to bottom, centred, with every part from the label to the note under the button at the size and spacing your picture shows. The heading is now in the heaviest lettering and the button in the next heaviest, as in your picture.

The rectangular button, the pale green box behind the label and the cream background follow your own notes on this slide, and the text and the button use the site's own colours closest to yours, which Saif keeps to, with the small line under the button a shade darker so it stays easy to read.

Live page: pivotprime.ae/diagnostic

Your slide on the left, the live site on the right

7.3 Done

remove all the stretched founder stuff etc

What was done. The four reader cards, starting with "The stretched founder", are gone from the opening screen. The paragraph now leads straight into the four points and the start button, with the spacing your picture shows.

Live page: pivotprime.ae/diagnostic

Your slide on the left, the live site on the right

7.6

Done

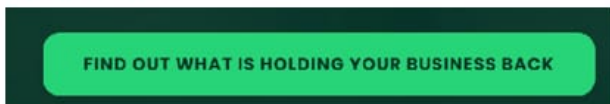

[3], start the diagnostic button to be rectangular like all other buttons and example shown below

What was done. The start button now has the same slightly rounded rectangular corners as the homepage button in your example and every other green button on the site, in the same bright green with dark capital lettering.

It is larger than the button in your example, with larger and heavier lettering, because your note [2] asks for the page to look like your second picture, which draws it this way.

Live page: pivotprime.ae/diagnostic

Your slide 7

Live site, computer

Your slide on the left, the live site on the right

Slide 8

The diagnostic results

8.1 Done

[1] I have to read all the different versions of advice we give, can you share

What was done. Every version of the advice is in a separate document sent with this report. It quotes your slide 8 note exactly and covers all six areas, each checked word for word against what the live diagnostic shows once someone enters their email address.

Live page: pivotprime.ae/diagnostic

The Word document, as it opens: title and your slide 8 note

The diagnostic advice, all six versions

For Iram. Your v3 slide 8:

[1] I have to read all the different versions of advice we give, can you share

The data all shown here, it will all pop up on screen when they enter their email address in, and look basically like this -
<https://claude.ai/code/artifact/e38bc4c5-1a88-4015-bed0-0016d663ae84>

This is every word of advice the diagnostic can produce. It is generated straight from the file the website reads, so it is what a reader sees, not a retyping of it.

The Word document, section 1: Founder dependency

1. Founder dependency

Shown when: Founder dependency is the reader's lowest scoring domain. Once the email address is entered it appears on screen under *Primary constraint*, and the emailed report carries the same words.

What this means for your business

When growth depends on the founder being present for every significant decision, it creates a ceiling that neither investment nor effort can raise. The founder becomes the bottleneck in their own business, unable to step back far enough to work on it rather than in it. Over time this erodes the team's confidence in acting without approval, and the business loses the organisational muscle it needs to scale. The cost is not always visible in a single quarter, but it compounds.

Three things to check this week

- List every decision you made last week that someone else could have made. For each one, write down why it came to you instead of being handled by the team.
- Check whether your team has written clarity on what they are authorised to decide without your sign-off. If they do not, drafting that document is this week's task.
- Identify one recurring process that only works reliably when you are present, and this week, teach someone else to own it completely.

What Pivot Prime would do about it

The Operational Clarity Audit

The Operational Clarity Audit begins by mapping every decision that sits with the founder by habit rather than by design. We redesign the delegation structure, document the authority framework, and work with the team until they are genuinely operating independently in the areas where the founder's time is most expensive. For founder-dependent businesses, this is typically where the largest gains are available fastest.

Its six section headings, one per area

1. Founder dependency

2. Process and delivery

3. Commercial and margin

4. Data and visibility

5. People and accountability

6. Technology leverage

Live site, computer: Founder dependency result

PRIMARY CONSTRAINT

Founder dependency

What this means for your business

When growth depends on the founder being present for every significant decision, it creates a ceiling that neither investment nor effort can raise. The founder becomes the bottleneck in their own business, unable to step back far enough to work on it rather than in it. Over time this erodes the team's confidence in acting without approval, and the business loses the organisational muscle it needs to scale. The cost is not always visible in a single quarter, but it compounds.

THREE THINGS TO CHECK THIS WEEK

1

List every decision you made last week that someone else could have made. For each one, write down why it came to you instead of being handled by the team.

2

Check whether your team has written clarity on what they are authorised to decide without your sign-off. If they do not, drafting that document is this week's task.

3

Identify one recurring process that only works reliably when you are present, and this week, teach someone else to own it completely.

WHAT PIVOT PRIME WOULD DO ABOUT IT

The Operational Clarity Audit

The Operational Clarity Audit begins by mapping every decision that sits with the founder by habit rather than by design. We redesign the delegation structure, document the authority framework, and work with the team until they are genuinely operating independently in the areas where the founder's time is most expensive. For founder-dependent businesses, this is typically where the largest gains are available fastest.

The live site, on a computer

8.2 Done

The data all shown here, it will all pop up on screen when they enter their email address in, and look basically like this – <https://claude.ai/code/artifact/e38bc4c5-1a88-4015-bed0-0016d663ae84>

What was done. Once someone fills in their details and presses "Unlock my score", your three sections appear on the same screen, on a computer and on a phone, in your order and word for word as in your pictures. None of them shows before that.

The two buttons read "Book a call" and "Talk to us on WhatsApp" and are rectangular, following your later instructions rather than the round "Book a call with Iram" in your picture, and the greens are the site's own colours, following Saif's rule for the site's palette.

Live page: pivotprime.ae/diagnostic

Your slide 8

PRIMARY CONSTRAINT

Data and visibility

What this means for your business

When a business leader cannot see how the business is performing without asking someone to compile the data, decisions are always made on information that is already out of date. The problem is rarely that the data does not exist, it almost always does, but that it lives in formats that require assembly rather than inspection. This creates a lag between what is happening and what leadership can respond to. In a competitive market, that lag has a real cost. It also means that when two people discuss performance, they are often working from different numbers without realising it.

THREE THINGS TO CHECK THIS WEEK

- 1 Try to answer the following without asking anyone to prepare anything: what is the business's revenue this month so far, and what is the margin on that revenue? The friction you experience in getting that answer shows you exactly what the problem is.
- 2 Identify the most important operational metric in your business and track how long it currently takes to produce it on demand. Anything over 24 hours is worth addressing.
- 3 Find a number that appears in more than one report or is produced by more than one person. Check whether it is consistent across sources. If it is not, that inconsistency is eroding confidence in your own data.

WHAT PIVOT PRIME WOULD DO ABOUT IT

The Operational Clarity Audit

The Operational Clarity Audit designs the reporting infrastructure your business needs to run on current information rather than historical summaries. We establish the handful of metrics that actually matter, connect them to the systems that hold the data, and build the dashboard that gives leadership a real-time view without manual preparation. The goal is visibility that requires no one to ask.

Your slide on the left, the live site on the right

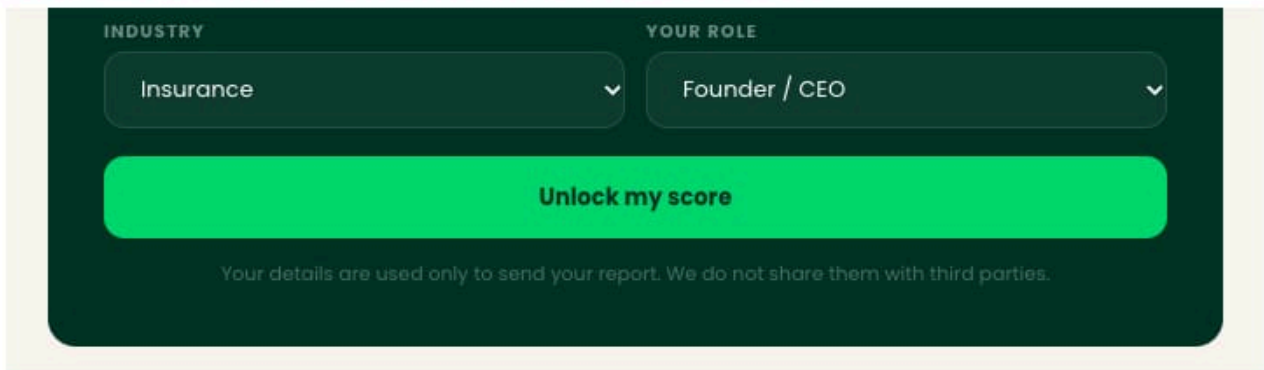

8.3 Done

The "Unlock my score" button is still a round pill. Make it rectangular.

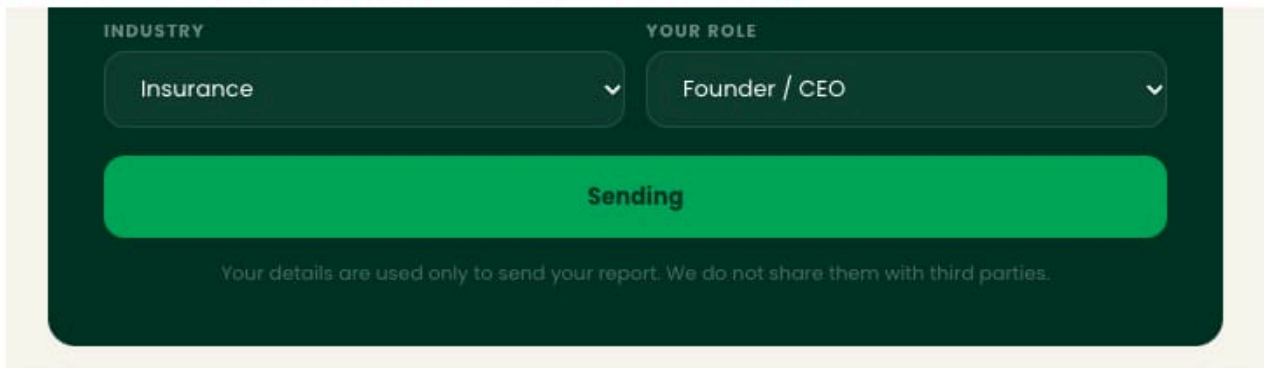

What was done. The "Unlock my score" button is rectangular, with the same small rounded corners as the site's other buttons, on a computer and on a phone, and it keeps that shape while it shows "Sending". Its wording and colours are unchanged.

Live page: pivotprime.ae/diagnostic

Live site, computer: Unlock my score at rest

A screenshot of a web form on a computer. The form has a dark green background with rounded corners. At the top, there are two dropdown menus: 'INDUSTRY' with 'Insurance' selected and 'YOUR ROLE' with 'Founder / CEO' selected. Below these is a large, bright green rectangular button with the text 'Unlock my score' in white. Underneath the button, in small white text, it says 'Your details are used only to send your report. We do not share them with third parties.'

Live site, computer: while it shows Sending

A screenshot of the same web form as above, but the bright green button now displays the word 'Sending' in white. The dropdown menus and the disclaimer text remain the same.

The live site, on a computer

Slide 9

The Insights sign-up

9.1

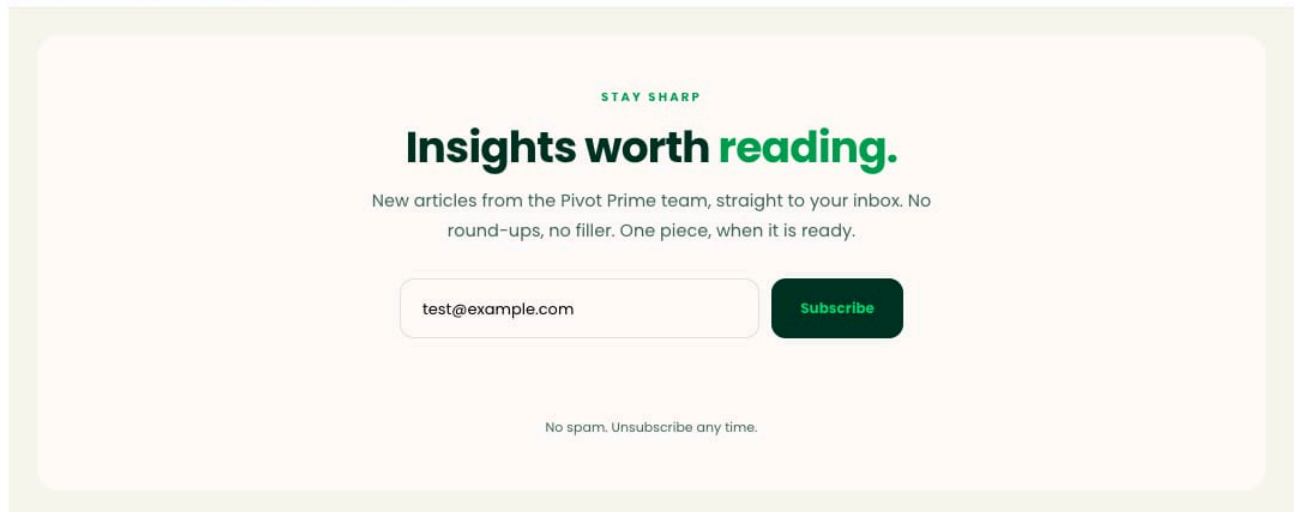

Done

[1] Fix this, it doesn't work when we subscribe

What was done. The sign-up failed because it sent from an email address the mail service had not approved; it now uses the same approved address as the contact form, and a real sign-up made on the live site on 2 October, with an address clearly marked as a test, showed "You are on the list. The next piece comes to you." instead of the error in your picture. The site only shows that message once the mail service has accepted the notice to hello@pivotprime.ae, which carries the subject "Insights subscription: delivered+test-please-ignore@resend.dev"; we could not see that inbox ourselves to confirm it arrived.

Live page: pivotprime.ae/insights

While sending

jane.doe@example.com

Sending

The live site, on a computer

9.3 Open

When the next article is published, test that subscribers receive the email and that its link opens the article.

What was done. This test has not been run yet. Each sign-up sends the new subscriber a confirmation and sends a notice to the hello@pivotprime.ae inbox, but the site does not email subscribers when an article is published, because that is a new feature that has not been built.

Still needed. Emailing subscribers when an article is published is a new feature that has not been built. Once it is agreed and built, and the sign-ups so far are gathered from the notices in the hello@pivotprime.ae inbox, the test can be run on the next article.

Live page: pivotprime.ae/insights

The screenshot displays the 'insights' section of the Pivot Prime website, featuring three article cards. Each card includes a category header, a title, a brief description, the author's name and initials, the date (Sep 2026), and the duration of the article.

Category	Title	Author	Date	Duration
UAE MARKET ENTRY	What it actually takes to launch a consumer product in Dubai	Iram Kauser	Sep 2026	9 min
OPERATIONS	The case for fractional leadership in a Dubai growth business	Iram Kauser	Sep 2026	7 min
FINANCE	Why growing businesses in Dubai need a CFO before they think they do	Justin Ford	Sep 2026	7 min

Below the article cards, a text box states: "The three September articles are live. The email to subscribers has not been tested: nothing sends it yet."

The live site, on a computer

Slide 10

The September articles

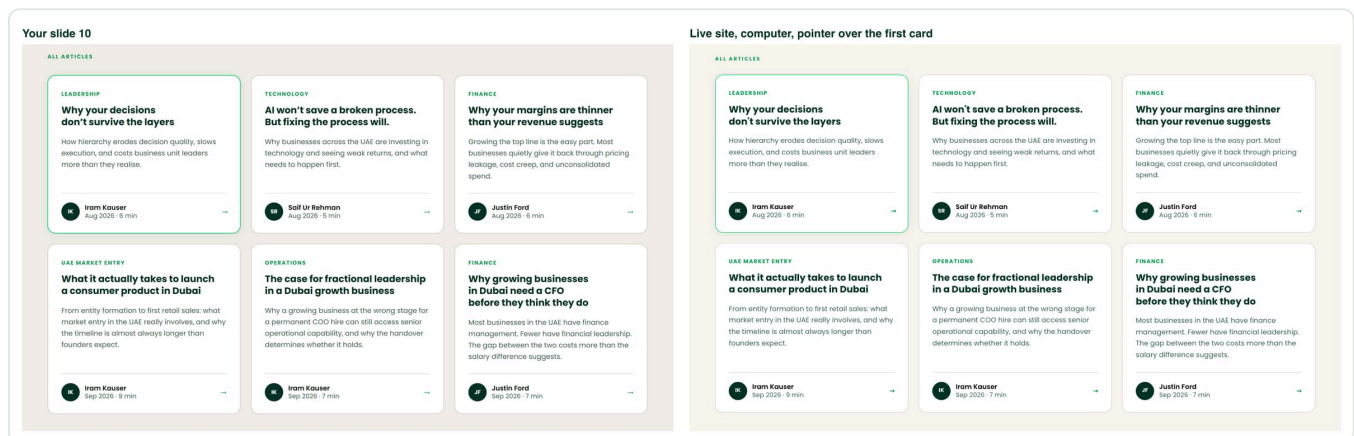

10.1 Done

[1] Add the three September articles shown below, for September – find full articles at – <https://claude.ai/code/artifact/374a7554-969c-4e4f-bb74-a4056085bd13>

What was done. The three September articles are on the Insights page after the August ones, in the order your picture shows, and each opens its own page with the full article from your link, word for word. All six cards follow the design in your picture, and the small arrow at the foot of each card is now drawn into the page at the size of the one in your picture, so every computer and phone shows the same slim arrow.

The page behind the cards stays the site's own cream and the text and line colours are the nearest the site's colours allow, following Saif's rule that the site keeps to its own palette.

Live page: pivotprime.ae/insights

Your slide on the left, the live site on the right

fractional CFO (by Justin Ford)

What was done. The CFO article is credited to Justin Ford, with his initials, both on its card on the Insights page and on the article page itself, where his role, "Fractional CFO, Pivot Prime", sits under his name.

This follows your slide 10 note and its picture, which name Justin, rather than the articles page you linked, which had it under your name.

Live page: pivotprime.ae/insights/fractional-cfo

Your slide 10

FINANCE

Why growing businesses in Dubai need a CFO before they think they do

Most businesses in the UAE have finance management. Fewer have financial leadership. The gap between the two costs more than the salary difference suggests.

Slide 11

The homepage as one flow

11.1 Done

Please use one content width for every section, so all headings, cards and buttons start on the same left edge.

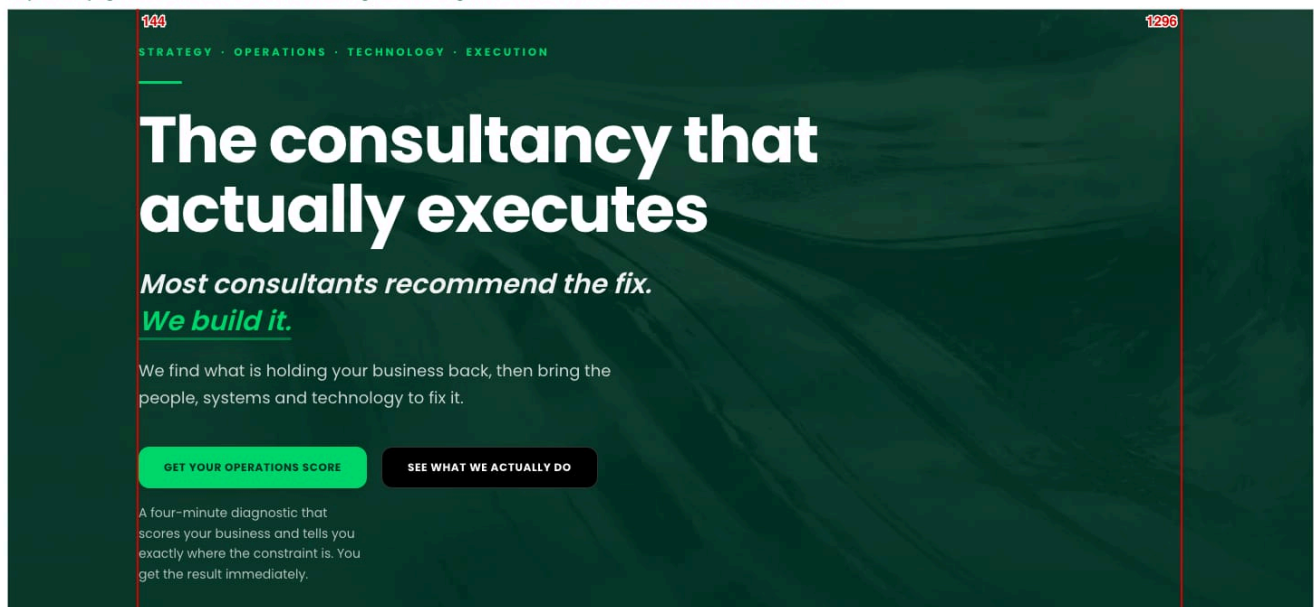

What was done. Every section of the homepage now uses one width, so headings, cards and buttons start on the same left edge, and every section stays within the same right edge, from the top of the page down to the closing box, on a computer and on a phone, including the places your red lines marked. Inside the three white boxes, the text and buttons start on one shared inner edge.

The closing box keeps its centred layout, as in your 26 September picture of it, and on a computer the TAKE THE DIAGNOSTIC button stays on the right of the "Start with the diagnostic" panel, as in your slide 2 picture of that panel.

Live page: pivotprime.ae/

Ask 11-1, one content width. Homepage at 1440 (computer), live site. Red: the shared edges 144 and 1296, used by all ten sections.

Top of the page: the small line above the heading, the heading, the text under it and the first button all start at 144.

"As featured in" and both logo rows start at 144 and stay inside 1296. Shown with movement reduced, so the logos stand still and wrap; with movement on, the rows slide and are cut at 144 and 1296.

144

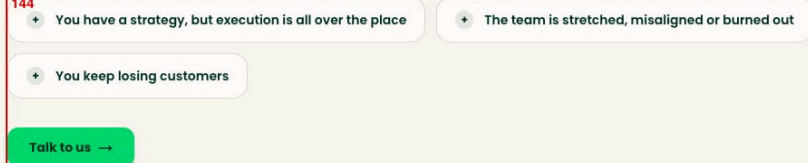

1296

As featured in [West Asia Watch](#) and [Arabian Mirror](#).

Your picture 20 area: each row of symptom buttons starts at 144, and so do Talk to us, WHO WE SERVE, its heading and the row of four choices.

144

1296

Your picture 21 area: the Who we serve box runs 144 to 1296, and MEASURED IMPACT and its heading start at 144. Orange dashes: inside the white box, the text and the button start at 193.

144

1296

You built something real, and everything still runs through you.

SEE WHAT YOU CAN TAKE OFF YOUR PLATE →

"Taking a two-week holiday without the business stopping was the proof it actually worked."

Founder & CEO, Tech-enabled logistics - Dubai

193 inside the box

WHAT THIS LOOKS LIKE:

- Every major decision lands back on your desk every single day.
- You are simultaneously the glue, the chief salesperson, and the backstop.
- Stepping away from the office for two weeks feels genuinely risky.
- You need systems, documentation, and placed leaders to run without you.

MEASURED IMPACT

This is what our team has delivered

We do not measure success in slide decks, we measure what has changed.

Our services: the heading and the three cards start at 144, the row of cards ends at 1296, and the "Start with the diagnostic" panel runs 144 to 1296. Blue: its button sits on the right of the panel (1021 to 1244), as in your slide 2 picture of this panel.

144

OUR SERVICES

1296

What do we actually do

WE DIAGNOSE

Operational Clarity Audit

From AED 15,000

We map exactly where your business is losing time and money. We find the constraints, the cost leaks and the processes eating your capacity, then give you a prioritised roadmap of what to fix and in what order. Most engagements start here.

Scope covers operations, finance, technology, compliance and people. For international businesses looking to set up in Dubai, we include UAE market entry feasibility as part of the audit scope.

See what the audit covers →

WE LEAD

Fractional COO, CFO and Chief of Staff

COO, Chief of Staff and CFO seats for businesses that need executive capability for a season rather than a lifetime. We build the operating model and run the weekly execution, then hand it to an operations lead so the structure holds long after the intensive phase ends.

Need people in the seats to execute? We also source, vet and manage Project Managers, Software Engineers and Operations Leads on your behalf.

How fractional leadership works →

WE BUILD

Technology Builds

Apps, websites, CRMs, workflow automation, AI agents and dashboards where technology genuinely removes cost. Come to us with a system you want built or a manual process costing your team hours every week, and we will build it.

See what we can build →

NOT SURE

Start with the diagnostic

If you aren't sure exactly what service you need, take our operational diagnostic. A four-minute diagnostic that scores your business and tells you exactly where the constraint is. You get the result immediately and also some steps on how to improve, immediately.

TAKE THE DIAGNOSTIC →

Your picture 22 area: the case studies box runs 144 to 1296, VIEW THE PRODUCT starts at 193 inside it (orange dashes), and MORE CASE STUDIES starts at 144.

CASE STUDY 1

Nurture

Childcare Technology · UAE

A childcare app where the household actually shares the day

Built by our technology team.

The challenge

In a UAE household the people caring for a child are rarely all in the same place, and often do not share a first language. Parents, nannies and drivers each hold part of the day, and none of them holds the whole of it.

The results

We built one place where the whole household sees the same day.

- ✓ Real-time care logs for feeds, naps and happies, with photo and video to a shared family timeline
- ✓ Instant messaging with one-tap translation across six languages
- ✓ Role-based access, so parents, nannies and drivers each see only what they should
- ✓ An activities hub of age-appropriate developmental guides, with Nurture Academy and its certified early-childhood courses
- ✓ AI meal planning, with a caregiver cookbook alongside it, and child development tracking across the household
- ✓ Built to UAE PDPL, encrypted in transit, with hashed PINs

Our fees box: 144 to 1296. OUR FEES and its heading start at 193 inside it (orange dashes), the same inner edge as the other two white boxes.

OUR FEES

Most consultants charge whether it works or not.

We are paid partly on whether the numbers move.

The closing box runs 144 to 1296. Blue: its heading (text 442 to 998) and its two buttons are centred inside it.

The live site, on a computer (continued across pages)

11.2 Done

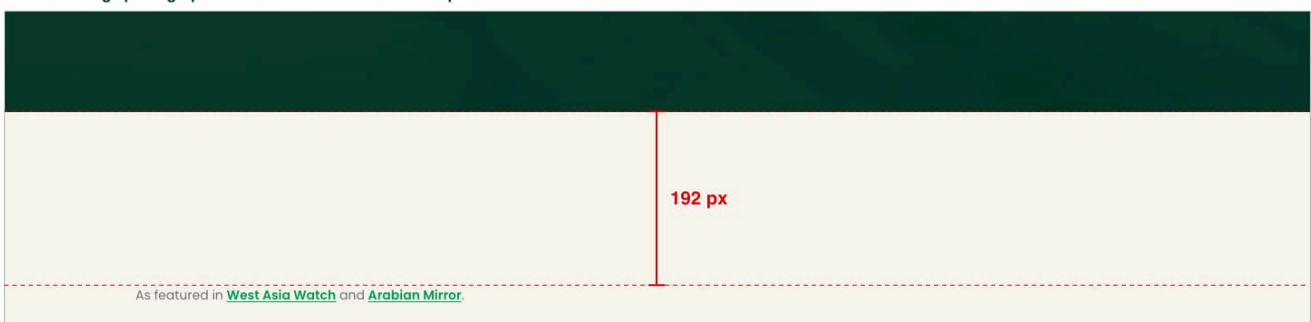

Use the same spacing between every section

What was done. The space under the large photograph at the top of the homepage, and on a phone the space under the small dots beneath the results, now match every other gap, so all nine gaps between sections are the same, including the three you marked. This holds on a computer and on a phone, whether or not the phone is set to reduce movement.

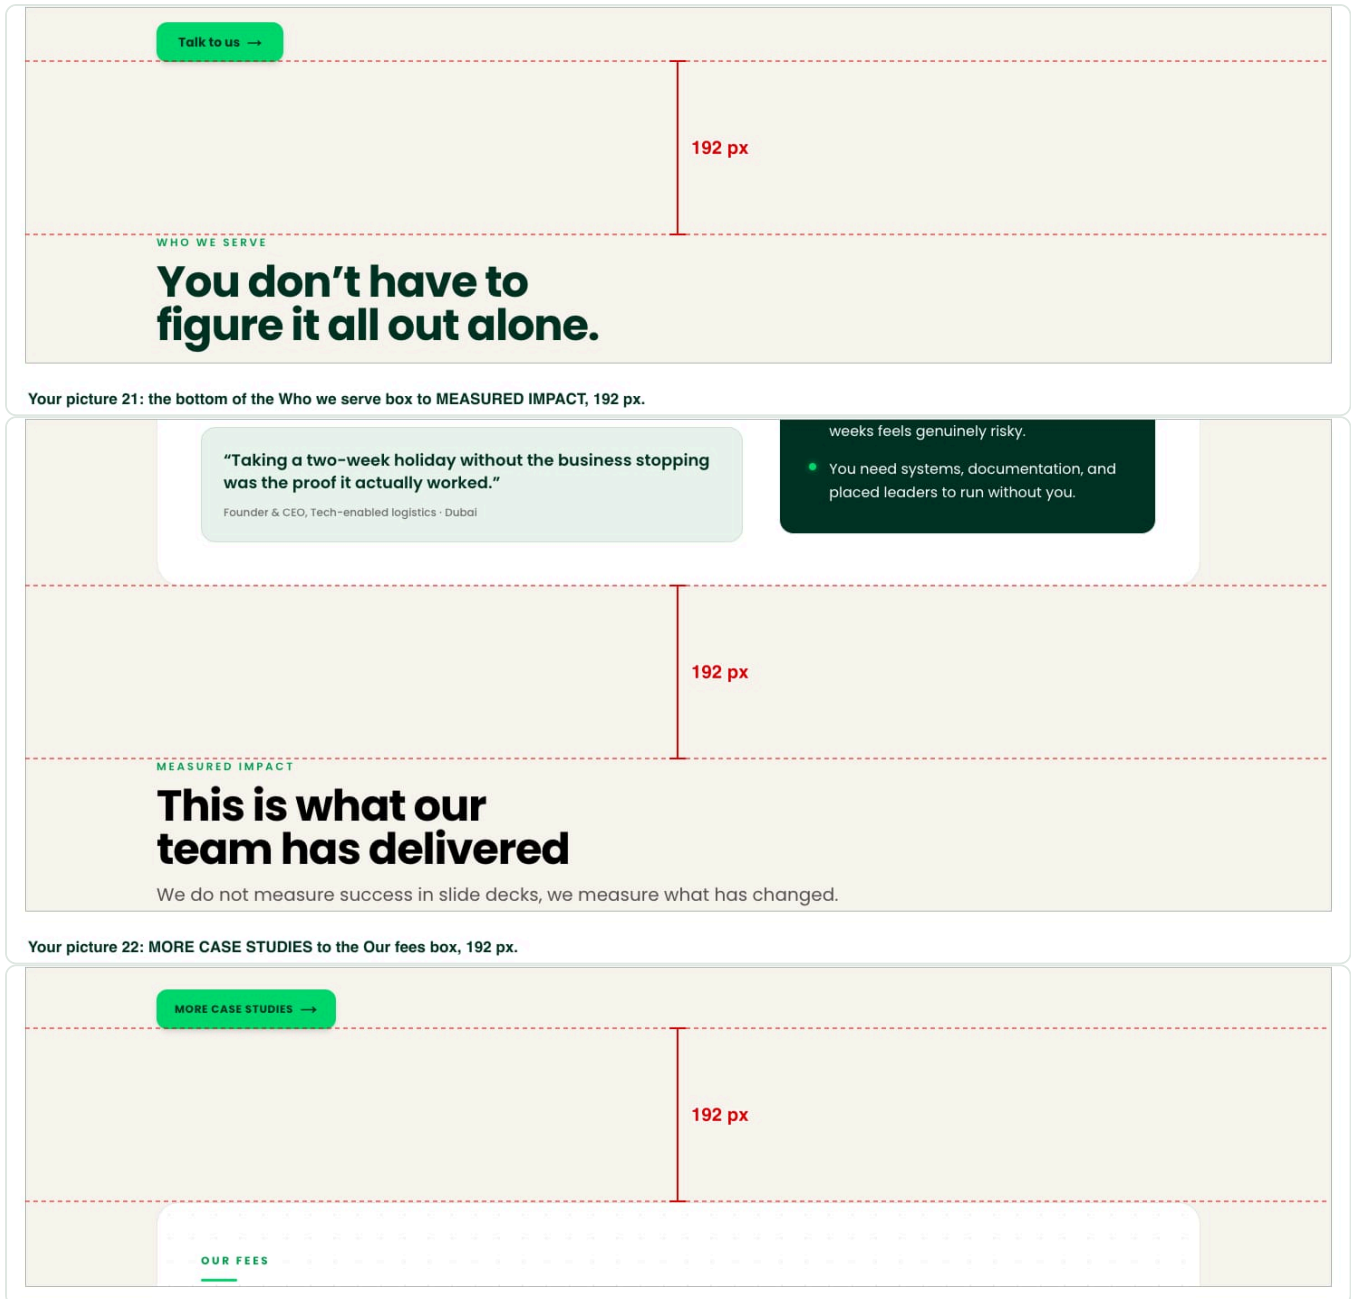

Live page: pivotprime.ae/

Ask 11-2, the same space between sections. Homepage at 1440 (computer), live site. All nine gaps between neighbouring sections are 192 px, from the last thing in one section to the first thing in the next: photograph to "As featured in", logos to symptoms, symptoms to Who we serve, Who we serve to results, results to services, services to the CEO, the CEO to case studies, case studies to Our fees, and Our fees to the closing box. The same with movement on.

Under the large photograph to the "As featured in" line: 192 px.

Your picture 20: Talk to us to WHO WE SERVE, 192 px.

The live site, on a computer (continued across pages)

11.3

Done

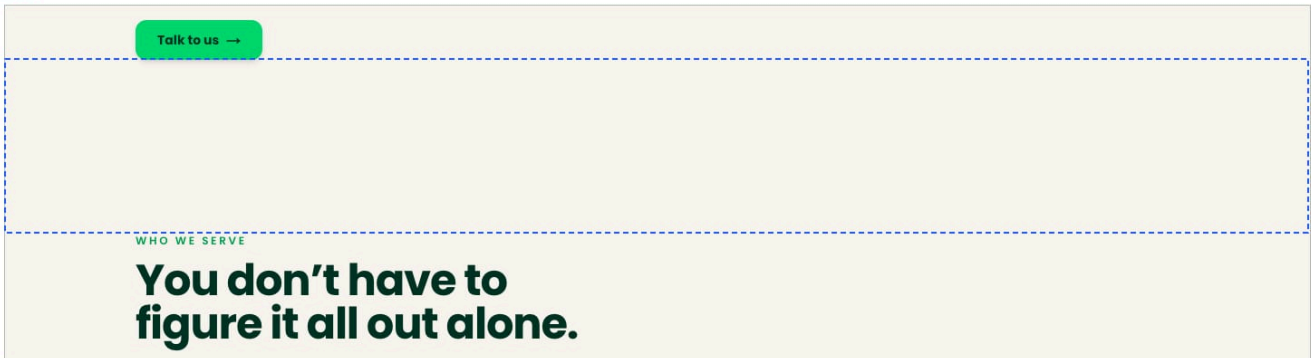

remove the thin divider line above Who we serve.

What was done. The thin line above Who we serve has gone, on a computer and on a phone. Between the Talk to us button and WHO WE SERVE there is now only the page background, apart from the button's own soft shadow, which fades away just below the button.

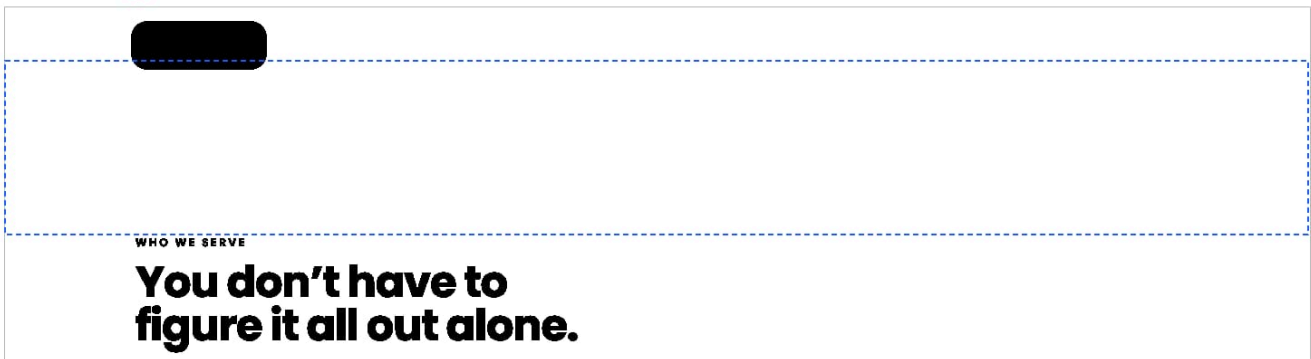

Live page: pivotprime.ae/

Ask 11-3, the thin divider line above Who we serve. Homepage at 1440 (computer), live site.

Between Talk to us and WHO WE SERVE (192 px, blue dashes): no line. Down the columns at x 720, 1080 and 1296, every pixel in the gap is the page colour #F8F4EE. The only other pixels are the Talk to us button's own soft shadow, which fades out 9 px below the button and stays under it (x 142 to 285).

The same strip, with every pixel that is not exactly the page colour #F8F4EE drawn black. Only the button, its short shadow and the text show. No row runs across the gap on its own.

The live site, on a computer

11.4

Done

Use one background colour for boxed sections.

What was done. The Who we serve, case studies and Our fees boxes are all the same pure white on a computer and on a phone, and none of the three has a shadow any more.

The closing box stays dark green, as in your 26 September picture of it.

Live page: pivotprime.ae/

Ask 11-4, one colour for the boxes. Homepage at 1440 (computer), live site. The Who we serve, case studies and Our fees boxes are all pure white, #FFFFFF, and none of them has a shadow: the page colour starts directly under each one.

Who we serve box: pure white. In the sampled area (blue dashes), 37,264 of 37,264 pixels are #FFFFFF.

You built something real, and everything still runs through you.

SEE WHAT YOU CAN TAKE OFF YOUR PLATE →

Our fees box: pure white. In the sampled area (blue dashes), 41,312 of 41,648 pixels are #FFFFFF; the rest are its faint dot pattern (#F0F3F2).

The closing box is dark green (#013325), as before. In the sampled area, 63,256 of 63,568 pixels are #013325; the rest are its faint dot pattern.

The live site, on a computer (continued across pages)

11.5 Done

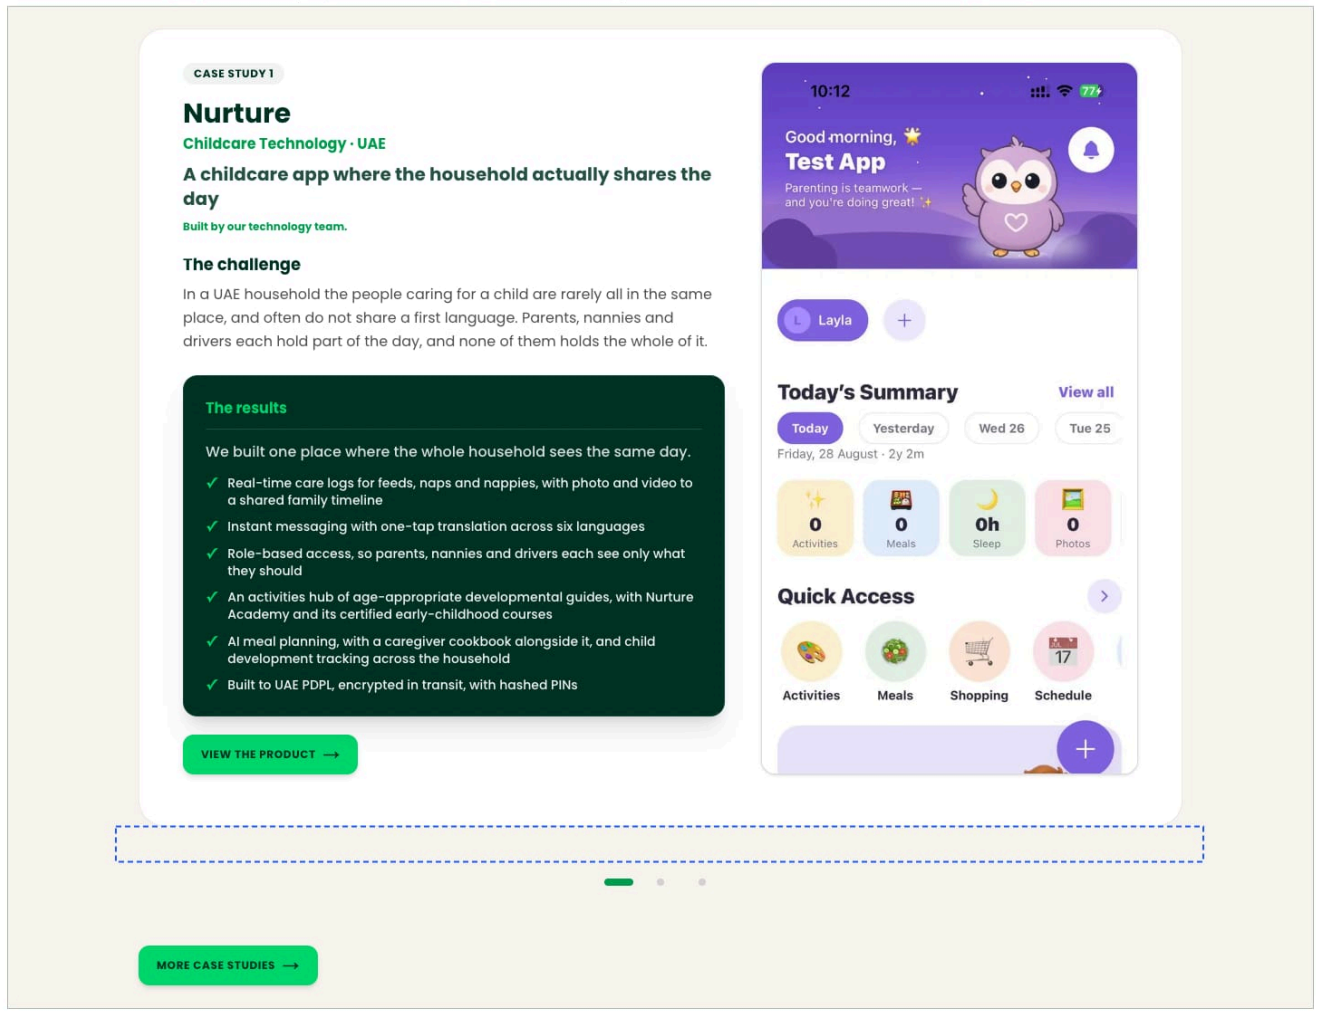

remove the band.

What was done. The grey band under the case studies box has gone: under the box and beside it there is only the plain page background, on a computer and on a phone.

Live page: pivotprime.ae/

Ask 11-5, the grey band under the case studies box. Homepage at 1440 (computer), live site.

Blue dashes: the strip directly under the case studies box, 40 px deep down to the slider dots and 24 px past each side of the box. This is where your red box 2 showed the grey band. All 48,000 pixels in it are the page colour #F8F4EE, and so are the 24 px beside the box all the way up this picture.

The live site, on a computer

Your earlier decks

Your 23 August and 26 September decks were checked to make sure nothing they asked for has since been undone. Of the 86 earlier requests your 30 September deck did not change, 74 are in place, 6 were put right during this check, 3 were changed by your later instructions and 3 are still to do.

Put right in this check

- **23 August deck, slide 2:** Stop centring the "As featured in" line so it matches the sections below. The "As featured in" line now starts on the same left edge as the headings below it, on a computer and on a phone, instead of sitting in the centre.
- **23 August deck, slide 3:** Change the results line to "we measure what has changed". The line under the results heading now reads exactly "We do not measure success in slide decks, we measure what has changed."
- **23 August deck, slide 14:** Remove the text under the seats diagram. The line of text under the Build and Place seats diagram is gone, so the diagram ends with the six seats on a computer and on a phone.
- **23 August deck, slide 16:** Change the heading to say you are not interested in launching a business in the UAE which will fail. The heading in the Straight answer panel on the UAE Market Entry page reads, word for word, "We are not interested in launching a business in the UAE which will fail."
- **23 August deck, slide 16:** Use your "If after assessment" line under that heading. The line under that heading reads your sentence word for word, starting "If after assessment, we feel your business will fail here", on a computer and on a phone.
- **23 August deck, slide 21:** Follow the About page HTML you emailed. The About page follows your emailed design, and The Bench now shows your five chosen capabilities in green, with the capital M back in "Project Management". The case studies section and team cards follow your later instructions instead, and the other capabilities on The Bench are slightly brighter than in your file.

Changed by your later instruction

- **23 August deck, slide 1:** Use the proper Pivot Prime logo. The top bar, the foot of every page and the browser tab all show the logo you confirmed as correct on 1 September. The logo files from your 11 August email were not used.
- **23 August deck, slide 20:** Retitle P&L card 1. P&L card 1 carries your new title and subtitle, with the long dash in the subtitle replaced by a comma, as you later asked for the whole site.
- **23 August deck, slide 20:** Retitle P&L card 3. P&L card 3 carries your new title and subtitle, with the long dash replaced by a comma, as you later asked for the whole site.

What is still needed

Slide 6. A screenshot of the live Nurture app's home screen, the same screen as now, showing a real-looking name in place of "Test App", taken from a demo account, because a real family's name and details should not appear on a public website. It is needed from you or Saif, taken on a phone in the same tall shape, and it will simply replace the current picture on the same card.

Slide 9. Emailing subscribers when an article is published is a new feature that has not been built. Once it is agreed and built, and the sign-ups so far are gathered from the notices in the hello@pivotprime.ae inbox, the test can be run on the next article.

23 August deck, slide 1. From you: a video for the top of the homepage, which you have the rights to use.

23 August deck, slide 1. The exact words for the second button at the top of the homepage, from you. Until then it keeps "SEE WHAT WE ACTUALLY DO".

23 August deck, slide 15. From Saif: the list of projects to show, a screenshot or picture of each with client details blurred, and which client names can be shown. His profile on the About page already names four of his projects, but there are no pictures yet.
